

George Heavenson K. Oti-Adjei

george@hearvie.dev | hearvie.dev | github.com/oti-adjei

Professional Summary

Software Engineer with 4+ years of experience building scalable applications across fintech, SaaS, and e-commerce. Proficient in Node.js, Go, Python, Flutter, and PostgreSQL with hands-on experience across the full development lifecycle; from backend API design and database optimisation to mobile/web frontends and DevOps pipelines.

Skills

Languages & Frameworks: Python, Node.js (Express), Go, PHP (Laravel), Next.js, React.js, TypeScript, Flutter, React Native

Databases: PostgreSQL, MySQL, MongoDB, Firebase

Cloud, DevOps & Linux: AWS (EC2, S3), Hetzner VPS, Docker, Caddy, Dockge, Dokploy, GitHub Actions

Tools: Git, Figma, Postman, GraphQL, Jira, Stripe, Claude Code, Codex

Experience

Lead Software Engineer (Frontend Architecture), [MashHarder](#) – Accra, Ghana Jan 2026 – Present

- Architecting and publishing MashHarder UI — a framework-agnostic Web Component library (Lit) enabling engineers to consume consistent, pre-built components across React, Astro, and Next.js without style conflicts.
- Established component design standards, TypeScript definitions, and NPM publishing workflows for a beta library with zero heavy dependencies.

Tech: Lit, TypeScript, Web Components, Shadow DOM, React, Astro, Next.js, Storybook, NPM

Founder & Software Engineer, [Senvon Atelier](#) – Accra, Ghana Oct 2025 – Present

- Founded a digital studio delivering end-to-end scalable software products — SaaS platforms and client-facing web applications.
- Current output includes Home Sweet Home (property management SaaS) and multiple client educational platforms.

Tech: Golang, React, Next.js, Flutter, TypeScript, TailwindCSS, PostgreSQL, Cloudflare,

Software Engineer, [Suronntech](#) – Accra, Ghana May 2025 – December 2025

- Built and maintained cross-platform mobile applications using Flutter and React Native, delivering seamless user experiences on Android and iOS.
- Developed responsive web applications using React and Next.js, improving performance and system reliability.
- Implemented Azure DevOps CI/CD pipelines and conducted regular code reviews, enforcing quality standards across the team.

Tech: Flutter, React Native, Next.js, React.js, Microsoft Azure, Jira, Figma

Mobile Developer, [Enyata Ghana](#) – Accra, Ghana Feb 2024 – Aug 2024

- Built and maintained production mobile applications with Flutter and React Native, integrating GraphQL and REST APIs for backend communication.
- Implemented Riverpod state management and local storage for offline functionality; enforced security best practices throughout.

Tech: Flutter, React Native, Riverpod, Firebase, GraphQL, ClickUp, Figma

Mobile Engineer, [teamAlpha](#) – Remote Feb 2022 – Aug 2023

- Built and maintained backend services and mobile applications serving over 8,000 active users across iOS and Android.
- Implemented CI/CD pipelines for automated deployments and built CLI tools for system monitoring, reducing manual ops overhead.

Tech: Flutter, Provider, Riverpod, Firebase, PostgreSQL, Docker

Junior Application Developer (NSP), [Agricultural Development Bank Ghana](#) – Accra, Ghana Oct 2021 – Nov 2022

- Developed internal web applications to streamline data sharing across branches; optimised database queries, reducing execution time by 40%.
- Supported deployment of an NIA verification system across branches, cutting customer KYC processing time by 30%.

Tech: PHP, Laravel, React.js, SQL

Data Analyst Intern, [Npontu Technologies Limited](#) – Accra, Ghana Jul 2020 – Nov 2020

- Used Python to clean and process large-scale datasets, improving data analysis accuracy and pipeline reliability.
- Streamlined data workflows and automation scripts, increasing productivity by 25%.

Tech: Python, Data Analysis tools

Projects

[Project List](#)

Home Sweet Home — Property Management SaaS hsh.senvon.studio

- Multi-tenant SaaS platform using Golang for high-performance backend services, Hono for edge-ready microservice APIs, and PostgreSQL for complex schema management across scalable user roles.

Tech: Golang, Hono, React, PostgreSQL, Docker, REST APIs

Gullivers' Travel Hotel — Hospitality Website gulliverstravelshotelgh.com

- Developed a dynamic, responsive website for Gullivers Travel Hotel, a client in the hospitality industry, featuring hotel amenities, services, and booking functionality.
- Initially built the site using HTML, CSS, and a template to deliver a functional, clean web presence.
- Led a full redesign 3 years later, rebuilding with React and Cloudflare Pages with SEO improvements; modernizing the UI, performance, and tech stack to current standards, tailored the site to the client's business goals.

Tech: React, Statikform,, Cloudflare Pages | Edge Functions | D1

Nagye Boutique— E-commerce Platform nagyeboutique.ca

- Custom e-commerce platform with Stripe and Square payment integration, Cloudflare Workers backend API, and SSR via Astro for performance and SEO.

Tech: Astro, React, Stripe, Square, Hono, Cloudflare Pages | Workers | D1

Purple Pay — Fintech Savings & Loans App [Enyata]

- Fintech Mobile application enabling cooperative savings and microloans across three product lines: Thrift Savings, Target Savings, and Micro-credit/Loans with community savings pools and monthly interest plans.

Tech: Flutter, REST API (Express), Riverpod, PostgreSQL

Education

Kwame Nkrumah University of Science and Technology (KNUST) – BS in Computer Engineering 2022

Mfantsipim School – Wassce [General Science] 2017
